(54) Title: METHOD AND SYSTEM FOR PROGRAMING AND CONTROLLING AN ELECTROSURGICAL GENERATOR SYSTEM

(57) Abstract: A method and system are disclosed enabling configuration of a control system for an electrosurgical generator system for creating new surgical applications without changing the underlying software system. The system includes an outer loop controller for generating a control signal in accordance with at least a first subset of sensor data from at least one sensor; an inner loop controller for generating a setpoint control signal which is provided to an RF stage in accordance with at least the control signal generated by the outer loop controller and a second subset of sensor data from the at least one sensor; and a configuration controller for generating configuration data and providing first and second configuration data sets of the configuration data to the inner loop and outer loop controllers, respectively, for configuration thereof to provide a type of control selectable from a variety of types of control.

A. CLASSIFICATION OF SUBJECT MATTER  IPC(7) : A61 B 18/18  US CL : 606/034							
According to International Patent Classification (IPC) or to both national classification and IPC							
B. FIELDS SEARCHED							
Minimum documentation searched (classification system followed by classification symbols) U.S.: 606/034, 27-31, 41-42, 45-50; 607/100-102, 122; 600/373-374, 549							
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched							
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)							
C. DOCUMENTS CONSIDERED TO BE RELEVANT							
Category * Citation of document, with indication, where appropring Y US 6.511.478 B1 (Burnside et al.) 28 January 2003 (28.0							
Further documents are listed in the continuation of Box C.	See patent family annex.						
* Special categories of cited documents: "T"  "A" document defining the general state of the art which is not considered to be of particular relevance  "X"  "E" earlier application or patent published on or after the international filing date	later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step						
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as "Y"	when the document is taken alone document of particular relevance; the claimed invention cannot be						
specified)  "O" document referring to an oral disclosure, use, exhibition or other means	considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art						
"P" document published prior to the international filing date but later than the "&"	document member of the same patent family						
priority date claimed  Date of the actual completion of the international search  Date	of mailing of the international search report
